**HYUNDAI DOES NOT SUPPORT THE USE OF AFTERMARKET /  
IMITATION / RECYCLED COLLISION REPAIR PARTS**

Hyundai vehicles and Hyundai Genuine Parts are designed and manufactured to meet Hyundai's exacting engineering specifications and to protect vehicle occupants in collisions.

Genuine Hyundai Parts, including all elements of Hyundai's air bag occupant restraint systems, are installed on Hyundai vehicles when they are crash-tested to ensure they meet the U.S. government's rigid collision safety and crash protection standards. Genuine Hyundai Parts work in concert to ensure occupant protection, vehicle integrity, and proper airbag deployment. Use of imitation, aftermarket, alternative or other non-original equipment Hyundai parts for the repair of any collision damaged vehicle may negatively affect vehicle crashworthiness and occupant safety during a collision and is not supported by Hyundai Motor America.

Additionally, Hyundai Motor America does not support the use or re-use of components removed or recycled from an existing collision-damaged vehicle. It may be difficult to tell if recycled parts are non-original equipment parts, or if the parts have been damaged as a result of prior collision or exposure to the elements.
